

Johannes Schroetter
(Chief Scientist, CEO, CFO)

Johannes Schroetter is in charge of the company and directs his ideas to production level prototypes by mastering all design, simulation and machining processes.

Mr. Schroetter has the highest qualifications in computer science and realizes his designs by accelerating simulation processes with the newest SSD Supercomputer at his facility. He designs his own computer systems and integrates design scripts from 3 dimensional magnetostatic field solvers over to the newest 5 axis prototyping machine centers. His leading position in the company and his direct contact to the machining process allows him to realize his own ideas and concepts. He developed logical conclusions that have never been studied in mechanical processes. As current research leader at Terawatt Research LLC Mr. Schroetter produces new solid results that will reshape science.

As early as 12 years old Mr. Schroetter built his own amplifiers and experimented in electroacoustics by building high end speaker systems. He studied communication electronics and computer science and worked for many companies as a research leader.
